## DETAILED ACTION

### *Election/Restrictions*

The restriction requirement is deemed moot since all of the remaining claims read on the elected invention.

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 5-7 and 9-10 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Behzad (of record).

Behzad (e.g. Fig. 14) teaches a programmable gain attenuator including: a termination resistor (e.g. R1927); a termination switch (e.g. U1419); a resistor ladder (R1921, 1923, etc.) between the input and the termination (Claim 8); a plurality of switches formed in a 4X2 matrix and some of the switches are turned on (e.g. see page 1, section [0004]) (Claims 5, 9, 11) and the switches can be grouped to be considered sub-matrices (e.g. switches (M31, M1, M32, M2) and (M33, M3, M3N, MN)) (Claim 7); Figs. 2 and 3 show that the attenuator having a control circuit that can have course and fine logic switches (16, 14) in the matrix and a multiplexer (e.g. 224) (Claims 6, 10).

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 1-4 are rejected under 35 U.S.C. 103(a) as being unpatentable over Behzad (of record) in view of Applicant's admitted prior art (e.g. Fig. 2) (AAPA).

Behzad teaches an attenuator as described above, but does not explicitly teach two resistive ladder PGA's on opposite sides of the termination resistor.

AAPA teaches a PGA having two resistive ladder circuits.

It would have been considered obvious to one of ordinary skill in the art to have modified the Behzad PGA to have included two PGA resistive ladders connected on opposite sides of the termination resistor such as taught by AAPA, because it would

have provided the advantageous benefit of a circuit capable of attenuating fully differential signals such as taught by AAPA.

***Response to Arguments***

6. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

***Conclusion***

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
